

THE CONDITIONS OF USING THE FITTINGS

The fittings offered by Lena Lighting S.A. have been designed and produced with particular care in order to ensure failure-free and long-term operation. They meet the conditions of use and safety specified by the norms.

In order to enable the fittings' failure-free and long-term operation, proper environmental conditions must be ensured. Some chemical substances may cause corrosion and discoloration of used materials decreasing the impact protection class and shortening the time of operation.

Below the exemplary list of chemical substances and their influence on the materials the fittings are made of (the list is only informative and does not contain all the substances which can shorten the time of the fittings' operation).

	Polypropylene	Polycarbonate	Polystyrene	Acrolonnitrile Butadiene Styrene	Acrylic
